Std X from CBSE and scored 96% in Board Examination

Ayodhya, UP  
March 2019

## PROJECTS

---

### ShopSmart an E-commerce website (6 members team project)

Machine Learning

October 2023

- Our platform sorts the process of selecting products by comparing prices and reviews across various websites to save user's time and energy.
- By comparing prices and reviews from different sources, we empower users to make better choices without the complexity of navigating through numerous websites and a huge clutter of products in online marketplace.
- Technologies used are Python, Html, CSS, JavaScript and Node.js.
- It is currently a web version which can later be developed in the form of application also.

### Verify a phishing URL detection website (6 members team project)

Machine Learning

May 2024

- Our platform verifies and detects fraud/phishing URLs on different parameters.
- Users simply copy the URLs of suspicious websites into our website's search bar, and they will instantly know whether the site is legitimate or not.
- Technologies used are Python, Html, CSS, JavaScript and Node.js, Decision tree, XGBoost, Support Vector Machine.
- It is currently a web version which can later be developed in the form of application also.
